

Operating in the strategic support of business development, EMIT contributes to the market by offering the use of high-end technology in Consulting (prospecting new business) and Engineering Process (Analysis of costs and Performance).

EMIT intends to fill a big gap in the area of provision of services, providing expertise, punctuality, fidelity and discretion, providing technical knowledge from its founder Cláudio Jambreiro Guimarães, possessor of successful experiences in the area for more than 40 years. Civil engineer with graduate specialization in business management, Cláudio has worked in many Brazilian states (SP, RJ, RS, SC, PR, MT, MS, RO, AC, BA, SE, PE, AL, RN, CE) and brings invaluable knowledge in the areas of engineering (see "Works Done" above) and business management in several segments:

- Low-income construction logistics
  
- Electrical appliances store
  
- Eyewear store
  
- Convenience store
  
- Sports club
  
- Prospecting coastal areas for large-size enterprises

The ability to conduct studies to improve efficiency in the areas mentioned above ensures that our engagement will lead to a profitable scenario in applied solutions, providing full integration and economic and social returns.
